Appl. No. : 10/628,212 Filed : July 28, 2003

## IN THE SPECIFICATION:

## Please amend paragraph no. 0137 as follows:

[0137] Alternatively, the microphone 75 can include a forwardly facing aperture, as illustrated in Figure 5B, and a wind sock 81 disposed over the aperture. The wind sock 81 can be made in any known manner. For example, the wind sock 81 can be made from a shaped piece of expanded foam. Configuring the bridge portion 52A' bridge portion 52A' as such is particularly advantageous because the bridge portion of an eyeglass is typically somewhat bulbous. A wind sock can be shaped complementarily to the bridge portion 52A' bridge portion 52A'. Thus, the sock 81 can be made so as to appear to be part of a normal bridge portion of an eyeglass.
